I find myself in a situation in which I have been seeking remediation and punishment against law enforcement for blatant violations of State and Federal Law within the United States. I recently learned that this misconduct includes treatment defined as torture by United Nations human rights laws. As the United States government has not been responsive to these issues I am reaching out to the International Criminal Court in hopes of seeking justice in the face of grave misconduct.

To shortly summarize the crime against humanity, I was placed and held in a solitary confinement cell for nearly 5-6 months straight and substantially longer in total. As previously mentioned, I recently learned that the UN has a set of laws governing solitary confinement called the Nelson Mandela Rules. These rules state that an inmate can only be placed in solitary confinement for 15 days, beyond which is considered torture. I was placed in solitary confinement through no fault of my own as an attempt by a governmental agency to place undue pressure on me based on my willingness to fight against unlawful law enforcement practices.

It is also noteworthy that I have been making numerous complaints at various levels of the US government with little to no response or action. This incident occurred at the Jefferson County Sheriff's Jail facility in Colorado prior to trial. What I have experienced has been a bastardization of law, justice, and the decency due to individuals at a fundamental level.

I look forward to hearing back from you,

Chris Hoffman
