Description: The use of solitary confinement beyond 15 consecutive days is defined by torture by a United Nations International Human Rights Law called the Nelson Mandela Rules. Torture is considered a crime against humanity. These rules were adopted by the State of Colorado as law in 2017.
I allege that lack of knowledge of State law by the presiding judge, prosecuting attorney, and public defender resulted in a situation that these individuals were not only complicit to torture but perpetuated it's use within a government facility. Either these individuals were ignorant towards critical laws governing this issue or they knowingly and wantonly broke the law which is undoubtedly a demonstration of moral turpitude and negligence towards the enforcement of law.

As I understand, officers of the peace are bound to ethical and professional standards of conduct that were not upheld during court proceedings. This resulted in a situation where the process of law was unduly delayed, undue pressure was prevalent, and the system of judicial equity bastardized. Ethical standards throughout the process must be questioned and I feel as though the Public Defender harbored individual prejudice and animosity towards me. This prejudice led to the wanton perpetuation of torture in retaliation by the court and it's officers.

I am seeking punishment against these individuals to the maximum extent of the law. This includes both in the formal court of law as well as seeking the revocation of their licenses for practicing law.

I look forward to hearing back from you,

Chris Hoffman

Additional Information: There had been a pattern of misconduct by law enforcement I am seeking to address. I have filed formal complaint with the FBI, the Federal Judiciary's Civil Rights Division, the Colorado Attorney General, the Denver Police Department, Jefferson County Sheriff Department, the Colorado Commission on Judicial Discipline, the Colorado Supreme Court's Office of the Presiding Disciplinary Judge, the International Criminal Court in the Hague, Netherlands (as intentional human rights laws were broken), etc.
