Dear Chris,

Judiciary matters as they pertain to systemic concerns are directed to Senator Hickenlooper's Washington DC office, where his legislative team track the concerns and process accordingly. I would like to confirm that I have already passed your judicial matters to our legislative team. If you would like, I am happy to request a follow-up response from the team confirming their receipt and possibly any other updates as they relate to judiciary.

Our Constituent Affairs department does not process systemic or judicial matters, our specialty is individual casework assistance with federal agencies. If you would like our office to inquire on a casework matter as it pertains to a federal agency (non-judicial in nature), we welcome the opportunity to assist further with these requests.

Respectfully,

Jacks Pastuer

Hi Jacks,

I appreciate the update regarding the legislative team. I understand that the situation in which I find myself is a bit odd as I have experienced a series of incidents that involve police misconduct across multiple jurisdictions within the State of Colorado. Further, these claims are backed by verifiable, ample, and sufficient evidence. As previously mentioned I have reported these incidents throughout the various jurisdictions in which they occurred which include Jefferson County, the City of Denver, the City of Wheat Ridge, and Adams County. I have also reported these incidents to the Colorado Attorney General's Office and the Colorado Commission on Judicial Discipline, among others.

I recently learned that the Wheat Ridge IA admitted that there were violations of department policy by two officers and that disciplinary and corrective actions have been taken in response to my complaint. I view this as a first step in a larger, more comprehensive set of corrective actions that law enforcement should necessarily take in the face of widespread misconduct throughout multiple departments within the State. Further, though I have had some conversations with the

other departments involved, what I consider to be some of the most blatantly illegal of the allegations that I have levied against these departments remain unresolved.

I also recently began to gather the video evidence from the multiple jurisdictions involved which clearly shows the misconduct of the officers involved. This video evidence includes a uniformed officer waving my keys in my face stating "I got a brand new vehicle," an officer stating "we didn't even know if it was the right vehicle we hit" (with a spike strip), an official officer statement that I was uncooperative and that he had to leg sweep me to the ground (and the video evidence that he didn't do so whatsoever), the 911 recordings before and after the threat of false arrest as well as the video from within the station and in my personal phone, and as previously mentioned the video of the officer within the District 5 Denver Police Station admitting complicity within the department, among other larger evidence that supports my claims. I plan to gather all of this evidence and if necessary use it in seeking asylum in a foreign country based on persecution from law enforcement within the United States of America.

That being said, I would like for you to request a follow-up response from the legislative team confirming their receipt of my messages and possibly any updates regarding my circumstances.

I appreciate hearing from you and hope you're doing well,

Regards

Dear chris,

I followed up with the legislative team. Once I receive a response I will reach back out.

Respectfully,

Jacks Pastuer
